Create cloud-based Gantt chart in Ahas! during the 30-day trial period. Gantt charts are useful tools for planning and planning projects. Product managers use Gantt charts in a number of different ways. For example, you can create a Gantt chart to manage a strategic planning process, a product release, or a user's research project. The free Excel and PowerPoint templates offered here make it easier to imagine what to do and when. Choose from different examples and change each chart according to your needs. If you want to use a collaborative Gantt chart, we recommend that you give Aha! Try. You can create a Gantt chart in a few minutes, collaborate with others, and collaborate with real-time copies. If you are not yet ready to do so, start with the free templates below. This Gantt chart shows the main activities that make up the overall release plan, including the features that are being delivered. You can track the status of each task by changing the color of the bar. You can also show the between tasks. This release template is perfect for agile TV teams. This allows you to visualize your sprint schedule and show user tracks that are filled with each sprint. It also includes important milestones, such as sprint planning and review meetings. Update the plan after each sprint to review the progress and re-evaluate all the work that can be completed by the release date. Use these Gantt chart templates to manage the strategic planning process. They are ideal for capturing the key activities that are necessary to build or reassess your business plan. They're useful when you start a new business, enter a new market, or update your product strategy. They keep everyone focused on the activities that need to be done to create a winning strategy. This template uses a weekly timeline to visualize important steps and tasks in your strategic planning process. You can also add important milestones, such as planning a kick-off session, or submit your strategic plan to the Board of Directors for approval. This template allows you to draw up a more detailed implementation plan. This allows you to set strategic planning tasks, visualize dependencies, and shade bars to indicate when tasks are completed. These templates are ideal for portfolio planning. They provide a summary timeline for releases for multiple products. They are ideal for showing managers how your portfolio's agenda aligns in one view. You can use them, for example, in annual and quarterly scheduling to help everyone understand the release schedule for the coming year, the duration of each release, and the time it is delivered. This template transmits the release schedule for several products throughout the year. It also shows the duration of each stage of the e-phase. This will contribute to a high level of resource planning and will enable teams to coordinate operational programmes. This template allows you to visualize the release time scale for multiple products. This is useful if you want to display dependency between publications. Expand each section to see the duration of each release. Use these templates to view your product plans throughout the year. They allow you to record the schedule for each release and include important details for each stage, such as start and end dates, the specified team, and status. They are great at coordinating the delivery of other teams. You can also use these templates to share how your product plan is progressing with drivers. This template is perfect for capturing your annual release plan in one view. You can change the color of the bars to visualize which team is responsible for each phase. This template provides a dashboard style method to help you submit the status of each publication. As the year progresses, update the template and add it to the status reports to show how you're doing about the plan. Gantt diagrams can be used to manage various projects and tasks. They can be used, for example plan the user's research, pilot plan or client advisory body. They make it easy to track all tasks to perform. Choose between different timelines to reflect your planning horizon. This template makes it easy to visualize project phases and completed tasks. Task bars are automatically added to the chart by using the information you enter in the chart table. This template uses a weekly timeline to track important tasks that need to be completed. You can also interrupt tasks as subtasks and indicate that they must be completed. This template is an easy way to track tasks completed each week. You can shade each bar to represent the percentage that has been completed. The timeline template for the construction project consists of typical ready-to-dos. This template gives you a predefined structure for a construction project. Easily import and export Excel files to work online with your tasks, manage dates, track progress, and evaluate your construction budget. You can use ready-made typical tasks or create new ones as much as you need by defining their start and end dates and making your project visually attractive in minutes. Change your to-do hierarchy – Simply change them to

groups that add sub-tasks. Updating the template is easy and quick. You can use the Office Timeline PowerPoint add-in to quickly update all these timeline templates or create your own project visuals. Easily change timeline texts, dates, colors, shapes, and styles directly from inside PowerPoint. Are you stuck with math homework? Ask the supervisor for free.
